NATIONAL HOSE AND EQUIPMENT LTD.

TEL: 416-298-0494 • Fax: 416-298-0626 • EMAIL: nhose@nationalhose.ca • www.nationalhose.ca

CONDITIONS OF SALE

1. All our agreements contingent upon accidents, strike, fires and unavoidable delays, and causes beyond our control.
2. Every effort is made by us to offer equipment and/or material to suit conditions stated by the purchaser but he shall be taken to have satisfied himself that any goods ordered will meet his requirements. We can accept no liability if it should prove otherwise, providing goods supplied comply with the quotation or tender.
3. Everything in our power is done to ensure good material and workmanship but owing to the nature of our products and the greatly varying working conditions, it is not feasible to guarantee a working life.
4. No term proposed by the buyer which is inconsistent with any of the terms set out in this document shall, whether expressly excluded or not have any effect upon the agreement.
5. Under no circumstances, herein contained or not, shall our company be under any liability for consequential or other damages.

CLAIMS ON DAMAGED PRODUCTS

Since our liability ceases when goods are delivered to the transportation company, **all claims on damaged goods received, with apparent or concealed damages, must be made to the transportation company concerned** Should there be any special shipping information required with respect to said shipment, we will be happy to advise.

SALES TAX STATUS

All our prices exclude federal and provincial sales tax. However when applicable, both taxes will be charged to the purchaser unless we have received the necessary certifications or exemptions.

SHIPPING TERMS

F.O.B. our plant unless otherwise agreed to in writing by ourselves.

TERMS OF PAYMENT

Net 30 Days unless otherwise agreed to in writing by ourselves. Payment Methods Accepted: Visa, Mastercard, Debit, Cash, Cheque and Bank with Transfer

NOTE

Before accepting any order we reserve the right to change or cancel any prices and/or condition of sale without previous notice, except when agreed to in writing by ourselves.

WARRANTY

Merchandise is warranted to be free from defect in material or workmanship. Liability under any express or implied warranty is limited to the purchase price of any merchandise proven defective, or at seller's option, to replacement of such merchandise. This warranty is in lieu of all other warranties expressed or implied and all other obligations or liabilities on the part of National Hose.

RETURNS POLICY- R.G.A. Number is a MUST for all returned goods

Cancellation of orders or return of goods cannot be accepted by us without a R.G.A. number or written consent given previously and on terms agreed to in writing by us. Authorized returns are subject to a minimum 20% re-stocking charge and freight must be prepaid, some products are non-returnable.

PRESSURE WASHERS

Large Fuel Tank
for continuous
operation

Throttle Down Control
reduces fuel consumption
& increase pump and
engine life
* Optional

Triplex Cat Pump
Plunger design
provides low pulse and
quiet operation,
delivers 4 gals/ minute
at up to 3000 PSI

**Abrasion
Resistant Finish**
All frames are acid
bathed, phosphated
and powder painted

High Torque Engine
With super hardened
valves, cam shaft, and
piston. Oil alert
standard on most
models.

- Easy starting
- 30% better fuel efficiency
- Quiet operating
- Automatic mechanical governor

**Transistor
Controlled Ignition**
Pressures a fast start
maintenance free
operation
* Optional electric start
(not including battery)

Powered by
HONDA
Power
Equipment

**13-inch Pneumatic
Tires** for easy
maneuverability and
maximum vibration
absorption

Water Inlet FilterKit
keeps the pump
trouble free

**In-Line Soap Injector
Kit** keep the pump
trouble free

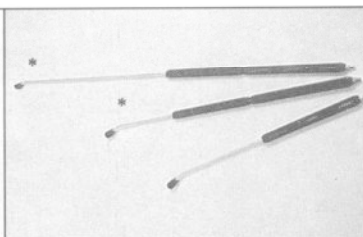

Thermo Value
safeguards pump from
overheating

STANDARD ACCESSORY KIT

Accessories shown below come on all Power Ease models

4,000 PSI Gun
Brass insulated,
impact resistant

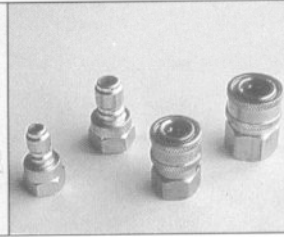

34" Zinc Plated Power Wand
Insulated handle, 3 hardened
stainless steel nozzles (0°, 25°, 40°)
*(These wands not standard, but
available for additional cost).

Stainless Steel
Guage
Liquid filled,
4,000 PSI.

Rubber/Braided
Wire Hose
50 ft. with all wheel type
models and 30 ft. with pack-
around model.

Quick Couple Fittings
for both ends of the hose
for quick set-up.

QUALITY CASTERS

1900 SERIES

S1933-125LU

- LOAD CAPACITY 250 LBS.
- OPTIONS**
- SIDE LOCKING BRAVE (SLB)
- TOP LOCKING BRAVE (TLB)
- SWIVEL AND WHEEL BRAKE (DLB)
- THREAD GUARDS (T6)
- BALL BEARINGS RACEWAY SEAL (C)
- BALL BEARINGS (SR & U WHEELS ONLY) (BB)
- ZERK AXLE AND LOCK NUT (GA)
- CHROME (19?2)
- YELLOW CHROMATE (19?5)
- MANY THREADED, ROUND & SQUARE STEMS

2000 SERIES

STAINLESS STEEL

S2059-HOLE U DLB

- LOAD CAPACITY 225 TO 275 LBS.
- OPTIONS**
- STAINLESS STEEL DOUBLE LOCKING BRAKE (DLB)
- MANY THREADED, ROUND AND SQUARE STEMS

4000 SERIES

S4003-125-SR

- LOAD CAPACITY 35 TO 350 LBS.
- OPTIONS**
- SIDE LOCKING BRAKE (SLB)
- ROLLER BEARING (3" & 4") (RB)

5200 SERIES

S5205-125 PLY

- LOAD CAPACITY 175 TO 300 LBS.

6200 SERIES

S6205-125-PH-RB

- LOAD CAPACITY 500 LBS.
- OPTIONS**
- TOP LOCKING BRAKE FOR SWIVEL CASTERS (TLB)
- DELRIN BEARING (DB)

6800 SERIES

S6806-125-MR-RB

- LOAD CAPACITY 400 to 1400 LBS.
- OPTIONS**
- REGULAR TOP LOCKING BRAKE (TLB)
- DELRIN BEARING (DB)

6900 SERIES

S6906-125-ST-RB

- LOAD CAPACITY 400 TO 1600 LBS.
- OPTIONS**
- HEAVY TOP LOCKING BRAKE (HTLB)

7000 SERIES

S7006-125-UR-RB

- LOAD CAPACITY 400 TO 900 LBS.
- OPTIONS**
- TOP LOCKING BRAKE (TLB)
- HEAVY TOP LOCKING BRAKE (HTLB)
- DOUBLE WELDING (DW)
- THREAD GUARDS (TG)
- 4-POSITION SWIVEL LOCK (4PSL)
- DELRIN BEARINGS (DB)

7100 SERIES

S7106-125-PH-RB

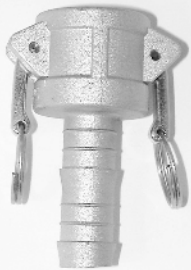

- LOAD CAPACITY 650 TO 2300 LBS.
- OPTIONS**
- HEAVY TOP LOCKING BRAKE (HTLB)

ALSO AVAILABLE:

- | | |
|-------------------|-----------------------------|
| Series 100 to 800 | - Office and Oth. Furniture |
| Series 8300 | - Ladder Casters |
| Series 8400 | - Scaffold Casters |

NOTE: All GJ-BOSS (Ground Joint Seal) Fittings on this page are recommended for “STEAM”

"WHIPCHECK" CABLE HOSE ANCHOR - NO TOOLS NEEDED, EASY TO INSTALL OR REMOVE, ANTI-CORROSION PLATED

These strong steel cables prevent hose whip in the event of accidental separations or couplings or clamp device.

"WHIPCHECK" reaches across the hose fittings to provide stand-by safety for any type of hose.

Spring-loaded loops in the cable ends open easily to pass over the couplings, for firm grip on hose, as shown.

Thoroughly tested with years of service. Two styles:

STEEL SAFETY CABLES

SINGLE AND DOUBLE BRASS BALL VALVE

* DKHA-10V

with "DOWNSTREAM VENTING"

Brass, nicked ball
reinforced TEFLON seal, BUNA N spindle seal, handle stop,
working pressure 400 PSI.

"Downstream Venting" is a unique built-in safety factor which allows dissipation
of air trapped in the hose when the air supply is shut off at the valve

PART NO.	SIZE INLET OUTLET	TYPE	LIST PRICE \$ EA
DKHA-34V	3/4" Fem. x 3/4" Fem.	Single Ball Valve	36.00
* DKHA-10V	1" Fem. x 3/4" Male	Double Ball Valve	116.00
RHG06N	Replacement Handles Nut		13.25

"DOWNSTREAM VENTING"

POLYPROPYLENE BALL VALVES

STRAIGHT THRU VALVES

Made of the same tough,chemically inert Polypropylene as the fittings
above. "Teflon" seats and "Viton" "O"-Ring seals. Easy to service and
easy, non-stick operations.

BANDS BUCKLES AND TOOLS

C-001 THE BANDING TOOL

A drop forged electroplated tool with tensioning capability of over 2,400 pounds and built-in cutter. Used to apply Bands and Buckles.

LIST PRICE \$198.00

G-402 GIANT TOOL

The Giant Tool must be used to apply heavy duty Giant clamps. Measuring 16 1/2" in length, it is designed to pull up to 6,000 pounds.

LIST PRICE P.O.A.

FERRULE CRIMPING TOOLS - FOR BRASS FITTINGS & FERRULES

MODEL 855 HOSE CRIMPER

855 -

Model 855 Hose Crimper provides production capability and "Big Tool" crimping advantages at just a fraction of the cost of other tools offering comparable results.

Rugged Construction - High strength ductile iron casting. Five hardened steel ribbed dies included.

Self-Contained - All dies in place, ready for instant use.
(No separate dies to lose or misplace.)

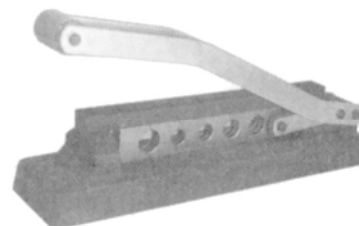

Portable - Carry it to the job, or mount on workbench as desired.

One-Hand Operation - Gives tremendous leverage by camming action at end of lever stroke

855 Crimper with 5 dies for 1/4" - 1 - braid through 3/8" -
-braid hose.

855A Same as 855 except largest die is replaced by 7/16 die for crimping 3/16" hose.
(Welding hoses, etc.)

Special dies up to 13/16" (1/2" I.D. hose) available.

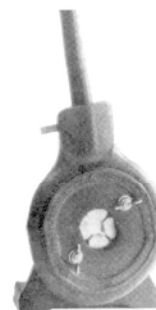

PART NO.	LIST PRICE
855	\$ 390.00
855A	\$ P.O.A.

MANUALLY-OPERATED FERRULE TOOLS*

SCOVILL NO. 5111A - Regular Ferrule Contracting Machine
Contracts all ferrules shown. - Base 8" x 3" - Body 7 3/8"
- Height with
handle upright 27" - Weight 2 lbs. NOte: does not include dies.

Part No	LIST PRICE:
# 5111A	\$ P.O.A.

- # 5111A

DIES FOR FERRULE MACHINES

Available in standard sets for all ferrules as tabulated
(4 segments to a set). Dies are supplied with plain or ribbed
contracting surface.

RIBBED DIES	List Price \$ P.O.A. (Set)
PLAIN DIES	List Price \$ P.O.A. (Set)

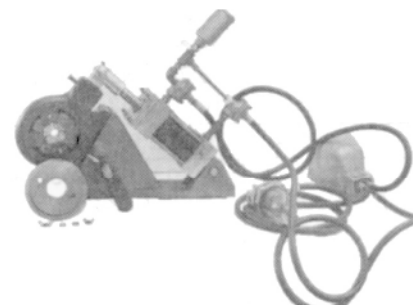

AIR-OPERATED FERRULE MACHINE SET

- # 1765A

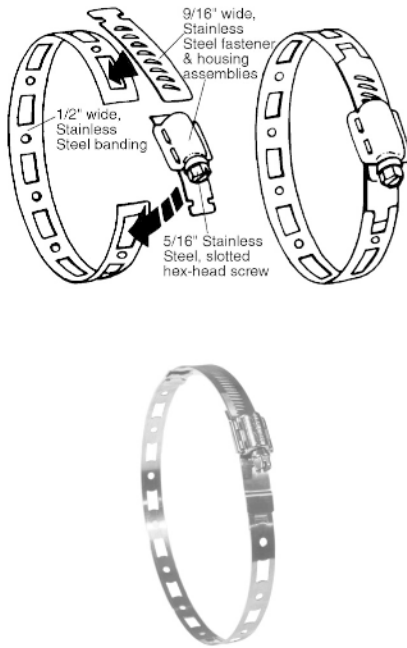

The mass production assembly of hose, ferrules and fittings is efficiently handled with this air-operated unit...foot pedal permits the use of both hands...reduces fatigue...speeds production.

SCOVILL NO. 1765A- Complete with air cylinder, ferrule machine (less dies), fitted hose lengths and necessary control valves.
Ready for work bench installation.

Part No.	List Price
1765A	\$ P.O.A.

MAKE-A-CLAMP KITS

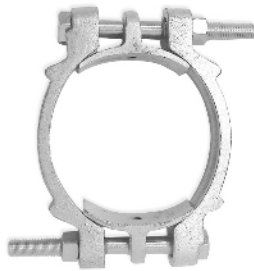

This is a maintenance clamp system in a box. By simply cutting off a piece of banding from a continuous roll, you can make any size 301 stainless steel worm-driven clamp from 2" diameter and up. It is a must for anyone likely to encounter requirements for varying sized large clamps.

1/2" band width
.023 thickness
Reusable

BAUER COUPLINGS (BLACK STEEL)

The easy handling HK-lever closure couplings, made of deep drawing steel, consists of only three parts;— ball-lever closure ring and socket (the latter comes with a rubber sealing ring that cannot get lost). When the HK-coupling is locked, the rubber sealing ring is pressed onto the coupling parts, providing thus for absolute suction and pressure. tightness no matter what the pipe's inside pressure might be. On special request we can supply oil-and heat-proof rubber sealing rings. Even in the dark and when soiled the HK-lever closure coupling is opened or locked with one simple grip. The ball shaped coupling parts permit a cone deviation up to 30 degrees while remaining absolute tight. Pipings with HK-quick closure couplings can therefore easily adjust to any uneven ground; bending will cause no disturbance and the conveyed media can pass evenly and unhindered, without whirls or loss. Delivery of coupling parts: hot galvanized or raw black. Measurement and weight and technical details can be seen from the chart.

SAFETY BLOW GUN

Basic safety blow gun for general purpose use. Tip pressure will not exceed **30 PSI**, yet gives a good basic blast of air cleaning.

Safety glasses or shield must be worn when using any blow gun

1/4" female NPT inlet

Part #	List Price
AC - 10	15.00

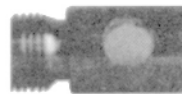

BLOW GUN EXTENSIONS and TIPS

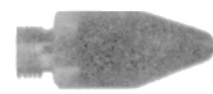

Blow Gun Extensions

Size Extension	Part#	Price
6"	BGE - 6	20.50
10"	BGE - 10	26.00
12"	BGE - 12	27.00

5/16" tip facilitates use in tight places.
Blow gun tip thread is 1/8" NPT.

SST10
fits Safety Blow Gun

D201RT
fits Rubber Tipped Blown Gun

Blow Gun Tips

Part #	List Price
SST10	6.25
D201RT	15.95

RUBBER TIPPED BLOW GUN

Provides leakproof seal between gun and fluid line or other opening. Also excellent for cleaning molds or delicate surfaces where a metal tip might scratch or otherwise harm critical areas.

Part #	List Price
D201	28.90

1/4" female NPT inlet

CAUTION: This blow gun does not have a safety by-pass to prevent buildup of tip pressure in the event of tip blockage. It may be used for cleaning purposes only if the air supply (inlet pressure) has been to 30 PSI or less.

PISTOL GRIP BLOW GUNS

- Contoured pistol-grip for safe, comfortable handling, even with greasy hands.
- Convenient "hang-up" hook
- Complies with the U.S. Dept.. of Labor, OSHA Standard 1910.242(B), permitting maximum occupational noise level exposure
- Comforms to Title 41, Walsh-Healy Rules and Regulations P50-204.8, Safety and Health Standards

Part #	List Price
PG700	74.00

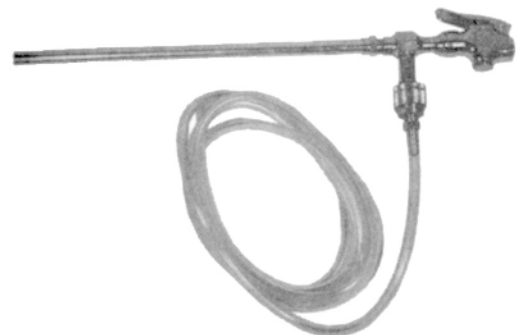

STANDARD BLOW GUNS

	FEATURES	PART NO.	LIST PRICE
 • Complies with OSHA 1910.985 and 1910.242 (b)	• Made of Impact Resistant Plastic • 5" curved tip • Full flow	AC-45	21.50
 • 1/4" Brass Female Port Insert	• Made of Impact Resistant Plastic • Ergonomic Hand Grip Operation • OUR MOST POPULAR GUN! • Meets OSHA • 1/4" Brass Female Port Insert	AC-45B	19.95

HYDRO-BLAST CLEANING TOOL & SIPHON

- Uses siphon to spray solvent or detergent solutions
- Uses regular garden hose plus compressed air to blast off dirt and residue
- Can be used with hot or cold water. Valve body stays cool even when used with hot water
- Used in garages and factories to blast off caked-on dirt from vehicles and equipment
- Complete, ready to use. D230 includes: Valve body, 2" and 15" extensions, six foot siphon tubing and adapter for garden hose

Part #	List Price
D-230	185.00

The tubing supplied is vinyl and the internal seals in the valve body are Buna-N. Consult chemical resistance charts for compatibility of solvents before putting gun into solvent service. Use safety equipment when using this tool. Eye and skin protection are necessary.

TIRE INFLATOR CHUCK

Ball foot chuck. For direct connection to live air only. Features a built-in shutoff valve (will not work on inflator gauges). Solid brass. 1/4" NPT female thread.

Part #	List Price
AC-04	5.00

AUTOMOTIVE QUICK-CONNECT FITTINGS

INTERCHANGEABILITY: with the more popular makes of Automotive Quick Connect Fittings which are accepted as "standard" such as Amflo, Dill, Milton and Truflo, There are some makes however, which do not interchange with any others. If you plan to interchange these couplings, make sure you have plug ends with the proper configuration.

INTERCHANGE CHART see page 32

60 SERIES-HIGH PRESSURE DOUBLE SHUT-OFF COUPLINGS

APPLICATIONS

60 Series couplings incorporate valves in both the body and nipple halves to prevent fluid loss when the coupling is disconnected.

these couplings are normally referred to as "hydraulic couplings", but the used with other media where fluid los on disconnect in objectionable.

60 Series couplings are available in zinc plated steele, brass, and 303 stainless steel.

DOUBLE SHUT-OFF HYDRAULIC COUPLING

H SERIES - STEEL BODY

Couplers

Nipple

FEATURES - H SERIES

- Ideal coupling for pressure loading of compartments and containers.
- Permits fast connection & disconnection of gas or fluid lines with minimal loss of media from either end.
- Positive, pressure-tight, sleeve-locking connection.
- To connect, simply retract sleeve, insert plug, and release sleeve. Locks automatically.
- Two-way valving action automatically balances in flow position and provides instant shut-off when disconnected.
- Straight through non-valved or slotted style valves available.
- Full 360° swivel action prevents hose kinking and twisting.
- Two O-rings in socket provide double protection against leakage.
- Special seals and O-rings available for fluids not compatible with standard Buna-N.

FLOW DATA

To convert air flow to other inlet pressure, multiply the low by factor. To interpolate for other pressure:
1 psi = .006 change infactor.

Inlet Pressure (psig)	25	50	75	100	125
Flow Factor	.60	.75	.90	1.05	120

AIR FLOW (standard cfm a 90 psig inlet)

Water flow may be used as shown for all inlet pressure.

DOUBLE SHUT-OFF COUPLIGS

5600-- K SERIES

FEATURES--

- Interchangeable with the Aeroquip 5600 Parker 6600, and ISO A interchange.
- Available with NPT connections.
- Two way check valves in plug and socket automatically balance in flow position and provide instant shut off when disconnected.
- To connect, simply retract sleeve, insert plug, and release sleeve. Locks automatically providing positive pressure tight connection.
- Permits fast connection and disconnection of gas or fluid lines with minimal loss of media from either end.
- Temperature range -40°F to 250°F
- FUD360 swivel action prevents hose kinking and twisting
- Non-valved, slotted valve and straight-through units available on request.
- Special seals and O-rings available for fluids not compatible with Buna-N
- Locking sleeve feature available by special order.

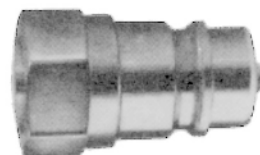

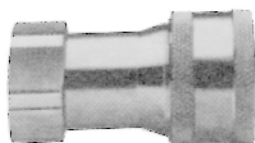

5600-K Series coupling are used in a wide range of hydraulic applications including Construction Equipment-- Manufacturing Machinery-- In Plant System. It's rugged construction is suited for mobile applications including Dump trucks, Snow Plows, Waste Haulage, Mining, Asphalt Paving, and Truck-Trialer connections. In-plant machinery application include hydraulic fluid, chemicals and gas lines for Paper Mills and Steel production, to name a few

FLOW DATA

To convert air flow to other inlet pressure, multiply the low by factor. To interpolate for other pressures:
1 psi = .006 change in factor

Inlet Pressure (psig)	25	50	75	100	125
Flow Factor	.60	.75	.90	1.05	120

SIZE	WORKING PSI	BURST PSI
1/4"	4,500	18,000
3/8"	4,000	16,000
1/2"	3,600	14,500
3/4"	3,600	14,500
1"	3,000	12,000

5602-16-16S	1"	6	33.00

DRY BRAKE HYDRAULIC SYSTEMS

FFN SERIES

FLAT FACE QUICK RELEASE COUPLINGS

The flat face valves minimize leaking during connection and disconnection operations. Very solid construction to withstand high working pressure and oil flows. Female and male parts reciprocally engaged on a long "portion" so that the unit ensures a very good mechanical resistance even with flexing tubes. The unit is connected by pushing male and female parts together. The female parts have a safety lock which avoids accidental disconnection. Complete quick release coupling is uncoupled by pushing back the sleeve. Base 06 (3/8") couplings of this series are on HTM standards (Hydraulic Tool Manufacturers Association) and are the same both in FFN and FFJ series. The FFJ series is designed to requirements laid down by the English market.

UNIQUE FEATURES AND BENEFITS OF FFN SERIES:

- 1) Rated to connect against residual pressure up to 870 PSI, 74% higher than competitive couplings.
- 2) Double locking Pins prevent accidental disconnection, should one pin be damaged or worn. Increased safety of application.
- 3) Greater safety factors: Maximum working pressure is 2,900 PSI with minimum burst of 13,750 PSI connected and 11,600 PSI disconnected on the coupler half.

FLOW RATE: 10 GPM *Spillage/Liquid Loss - 0.008 cc Max*
WORKING PRESSURE - 2,900 PSI * Minimum Burst Pressure

Connected: 13,700 PSI
 Nipple: 17,400 PSI
 Coupler: 11,600 PSI

APPLICATIONS: Hydraulic Hand Tools, Utility/Bucket Trucks, Railroad Maintenance, and other applications where minimal fluid loss is desired.

NO SPILL FLAT FACE VALVES

PART No.	COUPLER SIZE	LIST PRICE

3/8" INTERCHANGE: PARKER FF * AEROQUIP FD 49 * SAFEWAY 49

HIGH PRESSURE COUPLINGS

3000 T SERIES

FEATURES

- Interchanges with Parker 3000, Bruning IP-370, and Enerpac C-604
- For hydraulic ram and pump circuits with pressure requirements to 10,000 psi.
- Ball check, socket body, and plug are hardened steel, Socket and plug are zinc-plated to provide corrosion resistance.
- O-ring seal of polyurethane resists high pressure extrusion.
- Secure threaded locking sleeve; connects and disconnects easily by hand.
- Temperature Range -40°F to 250°F.

APPLICATIONS

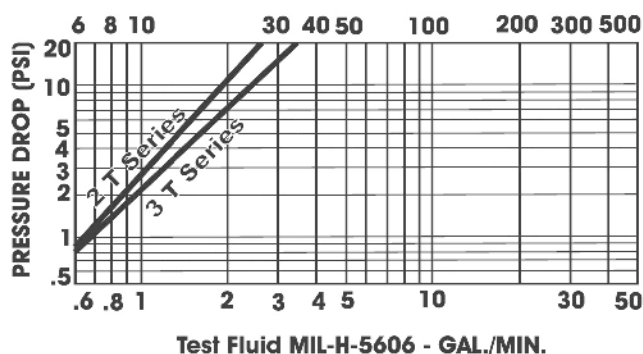

- 3000 T Series couplings with its threaded union locking system and precision ball-type check valve is designed for extreme pressure applications as found on portable hydraulic rams.

HIGH PRESSURE THREADED SLEEVE

FLOW DATA

To convert air flow to other inlet pressure, multiple the low by factor. To interpolate for other pressure:
1 psi = .006 change infector.

DCT-7x50	7/16 x 50'	P.O.A.
DCT-8x50	1/2 x 50'	P.O.A.
DCT-10x50	5/8 x 50'	P.O.A.
DCT-12x50	3/4 x 50'	P.O.A.

Available in long recoils to special order.

* Price Subject to Change

COPPER TUBING—

.049 Heavy Wall

Part No.	Size O.D. Coil	List Each
DCT-4.049x50	1/4 x 50'	P.O.A.
DCT-6.049x50	3/8 x 50'	P.O.A.
DCT-8.049x100	1/2 x 50'	P.O.A.
DCT-10.049x100	5/8 x 50'	P.O.A.

TUBE CUTTER—

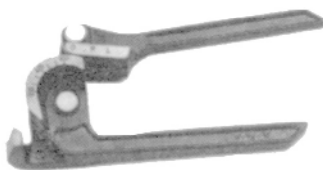

Capacity 1/8"-1-1/8" O.D. Cuts hard or soft copper tubing, brass, aluminum or thin wall conduit. Hardened rollers have flare cut-off groove to permit cutting directly behind a flare.

Part No.	List
DCT-1	P.O.A.

TUBE BENDER—

Excellent Sealant For All Threads

Part No.	Tube O.D.	List Each
T9-456*	1/4, 3/8, 1/2	P.O.A.
T9-8	1/2	P.O.A.
T9-10	5/8	P.O.A.
T9-12	3/4	P.O.A.

*Will bend a combination of three sizes

Special design to bend soft copper brass, aluminum and thin wall steel tubing, a light and easily handled bending tool which will permit bends on all planes of 10° to 180° without deformation of tubing.

Note: Tubing must be in annealed state; will not bend hard-drawn material

Applications

- For use with nylon, polyurethane, polyethylene and teflon tubings
- For compressed air or vacuum

Features

- Reusable, connects in less time than compression fittings
- Release button prevents accidental disconnection
- Unplugging tubes remains easy with snap fastener and collet.
- Elbows and tees rotate at the stud for easy piping in confined spaces

Specifications

Maximum Working Pressure
150 PSI

Working Temperature
5°C to 60°C (40°F to 140°F)

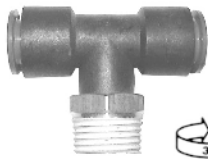

Thread
Thread portion: NPT (inch)
Nut: SAE

Construction
*Body: Nylon PBT
Chuck: Stainless Steel
Collet/Release Button: Polyacetal

*Brass Body Also Available

32-4494	12	3/8	26.50
32-4496	12	1/2	27.50

Applications

- For use with nylon, polyurethane, polyethylene and teflon tubings
- For compressed air or vacuum

Features

- Reusable, connects in less time than compression fittings
- Release button prevents accidental disconnection
- Unplugging tubes remains easy with snap fastener and collet.
- Elbows and tees rotate at the stud for easy piping in confined spaces

Specifications

Maximum Working Pressure
150 PSI

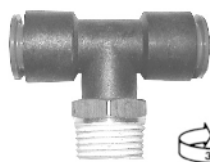

Working Temperature
0°C to 60°C (32°F to 140°F)

Thread
Thread: BSPT (metric)
Nut: Metric

Construction
*Body: Nylon PBT
Chuck: Stainless Steel
Collet/Release Button: Polyacetal

*Brass Body Also Available

BRASS COMPRESSION FITTINGS

FOR RIGID PLASTIC TUBING

USAGE: May be used with Polyvinyl, Polyethylene and Nylon Tubings.
Applications: For Instrumentation, Lubrication Lines, Air Systems and
Numerous other Areas where Non-Metallic Tubing is used.

High Pressure Industrial/Commercial
Pounds-to-Pounds Regulators

Designed to reduce container pressure down to between 3 and 100 PSIG. Ideal for liquid or vapour service with tar pot heater, fish cookers, salamander heaters and weed burning torches.

PIPE THREAD SEALANT

Not for use on oxygen systems.
We recommend Master Orange T-Tape

Masters Metallic Compound is a heavy duty pipe thread sealant of proven quality for use on both metal and plastic threaded connections. This all-weather product; Lubricates during assembly - Never sets up hard - Can be easily disassembled even after years of service.

Listed by Underwriters
Laboratories of
Canada
an the U.S.

Catalogue Number	Container	Net Contents	List Price
CP250BT	250 ML. (APROX/ 1/2 PT.) Brush-Top	850 g.	36.85

Not for use on oxygen systems.
We recommend Master Orange T-Tape

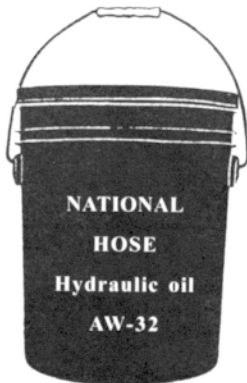

Masters Pro-Dope with Teflon is a non-toxic, non-corrosive, non hardening white paste. Masters Pro-Dope effectively seals both metal and plastic threaded connections. It will not dry out, stain, harden or separate. Lubricates during assembly and can be easily disassembled even after years of service. Masters Pro-Dope effectively seals most liquids and gasses against leakage to 10,000 p.s.i. and from - 200°F to +400°F (-129°C to +315°C)

Spanner Wrench - Part # G10, Price \$ 117.00

GREASE GUNS - LEVER TYPE

Model L1100

Deluxe Heavy Duty Lever Action Grease with Rigid Extension

- Heavy duty cast iron head
- Heavy duty rod, spring and follower
- Rapid spin barrel threads for fast reloading
- 4-jaw coupler with ball check
- Positive grip follower handle
- Filler nipple for 3-way loading
- Rugged baked enamel finish
- Ergonomic handle grip

List Price

54.00

Model L1150

Heavy Duty Pistol Grip Grease Gun

- Heavy duty cast iron head
- Heavy duty rod, spring and follower
- Rapid spin barrel threads for fast reloading
- 4-jaw coupler with ball check
- Bulk loading port provided
- Straight rigid extension
- Rugged baked enamel finish
- Filler nipple for 3-way loading

List Price

71.00

MANUAL BARREL PUMPS

Model L3000

Model L3000

Lever Action Barrel Pump

- Die cast head with steel piston and brass segments
- Fits 15-15 gallon drums
- Telescopic interests
- Telescopic suction tube
- Dispenses petroleum- based fluids

List Price

81.00

Model L3300

Model L3300

Rotary Barrel Pump

- Heavy duty cast iron body
- Dispenses petroleum fuel oils, kerosene or diesel fuel
- Steel suction pipe
- Fits 15-55 gallon drums with 2" bung opening
- Includes inlet tube strainer/filter

List Price

147.00

TRANSFER PUMPS

ROTARY HAND PUMP

- Will handle medium viscosity liquids
- For use with gasoline, diesel, oils up to SAE 40 and antifreeze
- Delivers up to 10 gallons per 100 strokes
- Cast aluminum body, built-in strainer and check valve
- 1" inlet, 3/4" outlet
- 8' hose with nozzle

Part No.	Price
112	P.O.A.

PISTON HAND PUMP

- Compact, high flow dual-action design
- Delivers up to 20 gallons per 100 strokes
 - Reversible pump flow
 - For use with gasoline, diesel, and oil
 - Cast aluminum body, stainless steel inner lining, zinc plated, built-in strainer and check valve, steel faceplate
 - Self priming
 - 1" inlet, 3/4" outlet
 - 8' hose with nozzle

Part No.	Price
F152	P.O.A.

DC PUMP

(Battery Powered)

- 12 Volts explosion-proof 1/4 HP motor using 18-20 amps
- Delivers up to 12 gallons per minute
- For use with gasoline, diesel, kerosene and oil up to SAE 10W at 72° F
- 12 ft. power cord with static ground wire
- Built-in strainer and check valve
- For installation on barrel or tank with 2 NPT opening

Part No.	Price
1210	P.O.A.

All pumps have telescoping suction pipe which extends 22" to 40".

2 WAY SOLENOID VALVES

General Description

These valves provide long trouble-free life on general service applications. A broad selection of body materials and operating pressures is available.

Applications

These dependable 2 way valves are used in:

- Plumps
- spraying
- cooling
- air dryers
- pollution
- controls
- Laundry equipment
- irrigation
- compressors
- dishwashers
- Water Treatment

Special valves available for: • dry air -gas •continuous cycling • exceptionally long life • heavy-duty operation • clickless and quiet (no AC hum) operation. Refer to Long Life Construction.

Specifications Operation:

Two types available

- Normally Closed--valves closed when de-energize, open when energized.
- Normally Open--valves closed when energized, open when de-energized.

Valve Parts in Contact with Fluid:

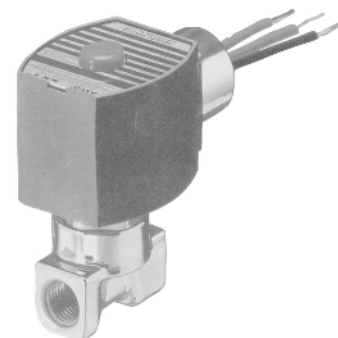

Body---Brass , Stainless Steel (Series 300), Nylon or Bronze as listed.
Seals and Discs---Buna "M", Teflon* or Ethylene Propylene, as listed.
Disc Holder---Nylon, as listed
Core and Plugnut---430F s.s
Springs---302 s.s.
Shading Coil---Copper (brass and nylon body)
Silver (stainless steel body)

Solenoid Enclosures: Two types available:

- Type 1** --- General Purpose.
- Types 4 and 7 (c and d)** Combination Watertight and Explosion-proof. Also meets Types 3 and 9 (E, F and G). Refer to Engineering Section for definitions and details. Consult you local ASCO office for Types 3S and 4X

Electrical: Standard Voltages

24, 120, 240, 480 volts, AC, 60 Hz (or 110, 220 volts, AC, 50 Hz)
6, 12, 24, 120, 240 volts, DC
Other voltages available when required

ASCO

Coil: Continuous duty Molded Class A, B, F, and H, as listed.

Temperature:

Fluid: To 210° F, as listed.

Ambient: Nominal Range, 32° F to 77° F (104° F occasionally---refer to Engineering Section)

Dimensions: Refer to Dimensions Tables for envelope size and mounting.

Attitude: Valves may be mounted in any position except as noted in the Dimensions Table.

THE CANADIAN NAME FOR A COMPLETE LINE OF BLAST CLEANING EQUIPMENT

- heavy duty portable blasters
- economy series
- parts and accessories

- reach in type cabinets with dust collectors
- high production units
- abrasives

- custom design automated system
- shot peening equipments
- blast room accessories
- wet blast cabinets

CANABLAST means abrasives. Since these cabinets require a light weight reclaimable media, the most common abrasives are glass beads and aluminum oxide. Contact us today and let us show you our competitive pricing and our wide inventory.

ABRASIVES

635107	#46 ALUM .OXIDE (50 lb. BAG)	120.00

Enjoy the benefits of HVLP with a SUPER System!

HVLP is the spray system that everyone is switching to. Instead of highly compressed air, it uses a high volume of low pressure air to atomize paint. The air is supplied by a high-output turbine that is maintenance-free. No compressor is needed and the quality of finish is identical to the best high pressure spray finishes. Because the air pressure is low, the FUJI HVLP gun produces a softer, easier to control spray. This lets you lay the paint on gently and not blast it on. Overspray is reduced by up to 80% for a cleaner, healthier workplace. Savings in paint can be as much as 50%.

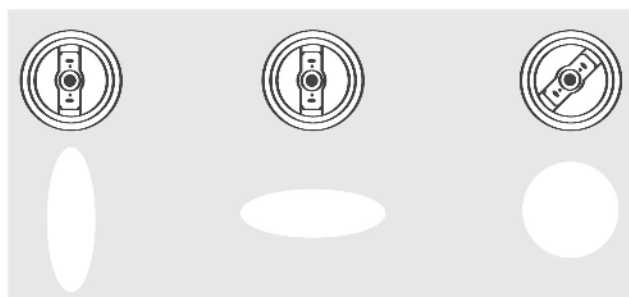

The FUJI SC-1 turbine spraygun features a self centering nozzle for a perfect spray patten everytime. Our aluminum nozzles are hard-

anodized to prevent wear. Needles and jets are stainless steel. The fluid adjusting screw and spraycap are made from Delrin, a lightweight, virtually indestructible nylon that is superior to aluminum. The gun and parts are machined on CNC lathes to aircraft tolerances.

NEEDLE No.	SIZE	METRIC	MATERIAL
No.2	.028	.7mm	Inks, stains, shading.
Mo.3 (Standard)	.040	1 mm	Lacquers, enamels, water-based coatings.
No.4	.055	1.4mm	As above with more coverage.
No.5	.079	2 mm	Splatter paints, latex.
No.6	.110	2.8	As above with more coverage.

With the FUJI SC-1 turbine spraygun it's easy to make spray pattern changes. Simply turn the floating nozzle and it clicks into position. By controlling the amount of paint and air, you can even use the FUJI gun like an airbrush for subtle shading or touch-up. Infact, one accessory is a 40z plastic top cup-ideal for spraying smaller volumes of paint. You vsn adjust the pattern size from 1/8" to 15" for all types of fine finishing.

The 'SUPER' model turbine is powered by a high performance, 3 stage, double ball-bearing, single speed, bypass motor that produces over 100cfm at 5 psi. This motor, made by Ametek-Lamb (Ohio) is the most powerful in its class. Three-stage means that 3 fans are used to develop air propulsion. The result is better atomization of paints-- especially high solids such as water-based coatings.

Here's what American Woodworker Magazine had to say about our SUPER model...

"The system includes an excellent three-stage turbine and features like a hose end airvalve...the gun atomizes beautifully and has a full range of features.

"Quality of atomization rated 9.8 out of 10."

The complete system is CSA approved. All electrical components are UL listed. The FUJI warranty covers parts and labor for a period of 2 years after purchase.

Some facts about FUJI Spray that you may not know...

- We are a 100% North American Company.
- Our only product is HVLP (since 1986).
- North American manufacturing content is over 96%
- We sell directly to the retailer eliminating middlemen and saving you dollars.
